# Mushroom Investigations

**Step 1:** Place the mushrooms on your desk. Observe and discuss with your partner(s) the attributes and characteristics of each mushroom. Make careful observations of the color, size, shape, texture, hardness or any other characteristics that you notice.

**Step 2:** After observing your mushrooms, describe each mushroom using sensory details (sight, smell, touch, sound) but do NOT taste them! Record your descriptions here:

**Mushroom 1:**

**Mushroom 2:**

**Mushroom 3:**

**Mushroom 4:**

**Step 3:** Watch the video about mushroom varieties.

**Step 4:** Label each of your mushrooms based on the official name that you learned about in the video.

**Step 5:** Add additional information and observations based on what you learned from the video.
